Lana Bijelic, *CHU Moises Broggi/HU Bellvitge & Peritoneal Cancer Institute, Barcelona, SP*

Domenico Sabia, *CHU Moises Broggi/HU Bellvitge & Peritoneal Cancer Institute, Barcelona, SP*

Honorary Chair

Paul Sugarbaker, *Washington Cancer Institute, Washington DC, USA*

Aim of the course

This comprehensive workshop will address the state-of-the art multimodal treatment of patients with peritoneal surface malignancies, combining lectures, small groups discussion, video-based education and live surgery. The main objective is to provide participants foundational knowledge based on the most up-to-date evidence on the diagnosis and optimal interdisciplinary management of patients with peritoneal surface malignancies through internationally renowned experts in the field.

Educational methods

- Plenary lectures
- MDT case sessions
- Small group discussions
- Video-based education
- Live surgery case

Main topics

- High-end surgical approach, important tips from experts
- Patient selection for PSM multimodality treatment
- Value of CRS for different disease types
- Morbidity and Mortality, expert recommendations to reduce the failure to rescue
- Selection and appropriate indications for intraperitoneal chemotherapy (HIPEC and PIPAC)

Target audience

- Teams of surgeons, gynecologic oncologists, oncologists and nurse specialists that are already involved in treating patients with peritoneal surface malignancies
- Surgeons and oncologists considering starting a peritoneal surface malignancy program.
